Q5
Where in your Advisory Neighborhood Commission, not just your SMD, do you think density should be increased to accommodate the construction of new housing? If you do not think density should be increased in your ANC, please write, "I do not think density should be increased in my ANC."

While ANC3D is mostly single family homes, corridors such as MacArthur Blvd. have several locations where increased housing density could easily be achieved, including through increased mixed commercial/residential projects.

Q6
I consider affordable housing to be (check all that, in your opinion, apply):

Costing no more than 30 percent of one’s household income
Q7  
I consider market-rate housing to be (check all that, in your opinion, apply):  
Not means-tested or income-restricted,  
Unsubsidized,  
Not rent-controlled

Q8  
The District’s inclusionary zoning law “requires that eight to 10 percent of the residential floor area be set-aside for affordable units in most new residential development projects of 10 or more units.” The cost of doing so is paid by a project’s developer, and IZ units are income-restricted. Because the number of IZ units is tied to floor-area ratio, the larger a building is, the more IZ units will be built. Conversely, if the initial density proposed by a developer is reduced during the approvals process, rather than maintained or increased, fewer IZ units will be built. ANC commissioners are likely to hear from some constituents concerned by a project’s potential impact—real or assumed—on traffic, parking, views, and property values and rents, and whether it fits the character of the neighborhood. While it is not a guarantee that a development proposal including IZ units will come before your ANC, if one does, what would you do, given the likelihood of at least some pushback?  

I would encourage developers to maximize the height and density of the project.

Q9  
Planned unit developments are projects in which developers are able to exceed the height and density allowed by the District’s zoning code up to the density allowed by its Future Land Use Map (typically a modest increase in scale) in exchange for a community benefits agreement. While it is not a guarantee that a PUD will be proposed in your ANC, if one is, the commission is likely to be the party negotiating that community benefits agreement with a developer. The following are examples of benefits that an ANC might push for in such an agreement. Please rank them in the order in which you would prioritize them.

More income-restricted, subsidized units than are required by District law  
Income-restricted, subsidized units restricted to lower income levels than initially proposed by the developer  
Income-restricted, subsidized units with more than one bedroom  
Parks, landscaping, and/or public art  
A Capital Bikeshare station  
Improvements or repairs to, or replacement of, streets and sidewalks  
Direct cash payments to local organizations, such as civic associations and ANCs  
Direct cash payments to local schools and youth programs

Q10
Check any of the below combinations of features that you would consider social housing.

- District-owned housing on District-owned land, built by a District agency and managed by a District agency.
- District-owned housing on District-owned land, built by a District agency and managed by a private property-management company.
- District-owned housing on District-owned land, built by a private construction company and managed by a District agency.
- District-owned housing on District-owned land, built by a private construction company and managed by a private property-management company.

Q11
Should apartments be legal to build District-wide?

No

Q12
Which statement do you agree with most?

New housing should be built both along major corridors and throughout existing residential neighborhoods, in buildings of all sizes.

Q13
Which of these statements best describes your feelings about historic districts in the District?

Historic districts are important, but they are also problematic. We have the right number of historic districts and landmarks and shouldn't be adding more.

Q14
The District is likely to begin a rewrite of its Comprehensive Plan, its foundational land-use document, in 2025. In a rewrite of the Comprehensive Plan, which of these three options would be your top priority?

Preserving or creating green space in my commission's area.

Q15
My ANC, not just my SMD, has:

Too few bars and restaurants

Q16
Do you think there are not enough cars, enough cars, or too many cars in the District?

Enough cars
Q17
The Sustainable D.C. 2.0 plan includes a target of reducing commuter trips made by car to 25 percent. Do you agree that incentivizing residents and visitors to drive less should be an explicit policy goal of the District?

Yes

Q18
Incentives for people to drive less and nudges to make them drive safely can prevent drivers from killing other people, but research shows such “carrots” won’t be enough to curb the public health crisis of increasing traffic fatalities. Keeping people alive and safe on District roads requires policies that actively reshape our transportation systems and built environment to decrease single-occupancy vehicle trips, and to slow down drivers when they do make those trips. Please rank the following policies in the order that you would like to see the District government pursue them.

<table>
<thead>
<tr>
<th>Policy</th>

</tbody>
</table>
Q19
The above question asks about systemic policies to reduce trips by car that the District's executive and legislative branches would need to initiate. As a commissioner, your powers are only advisory, but the intensely local nature of the role means that you can direct your attention to shepherding improvements to the built environment in your neighborhood that, while smaller in scale than changing District law or instituting a new citywide program, are no less important to making all road users safer. Please rank the following initiatives in the order you would be most enthusiastic about your ANC considering a resolution concerning them.

<table>
<thead>
<tr>
<th>Initiative</th>
<th>Rank</th>
</tr>

</tbody>
</table>

Q20
On-street parking occurs in public space. This means that an on-street parking spot does not belong to a specific individual, and people park in different places at different times. What do you consider a reasonable rule of thumb for deciding if a neighborhood has enough street parking?

Q21
The District's goal to be carbon-free by 2050 requires most of the reduction of its transportation emissions to come from residents turning existing single-occupancy vehicle trips into transit, walking, and biking trips. Please describe at least one trip you currently take by car (even if you, yourself, are not driving) that you can commit to taking on foot, by bus, by train, via a mobility device, or by bike instead.

Some trips to grocery stores
Q22
What do you feel is the biggest issue in your neighborhood, and what is your position on it? And, given the limited scope of commissioners’ and commissions’ authority, what would you, most realistically, do about that issue if you are elected?

I feel the biggest issue in my neighborhood is, and my position on it is: Lack of sidewalks and walkability in some areas

If elected, I would: Continue to pursue a complete sidewalk network, filling gaps and fixing damaged sidewalks

Q23
ANC commissioners represent about 2,000 constituents and, when sworn in, commit to upholding the District of Columbia's interests, not solely your commission's or single-member district's. With the understanding that you are not going hear from every single one of your constituents during your term, and that commissioners are sworn to act in the interest of the entire District, describe how you might make decisions as an elected representative.

I would base decisions on a combination of constituent input, which I would seek to ensure is representative, along with judgment as to what best promotes the SMD's and District's long-term interests.

Q24
Why do you think you are the right person to serve as an ANC commissioner for your SMD?

I have extensive experience working on neighborhood issues, including through serving on the ANC's transportation committee since its inception and as a member of the AU Neighborhood Partnership. As a resident in the neighborhood of nearly 20 years, I have come to gain a sense of the concerns and preferences of residents.
